How to Use in Figma

GETTING STARTED WITH AURAU

Step 1: Open Figma

Go to figma.com and sign in (free account works fine).

Step 2: Import the File

Go to File > Import and select the AuraUI .fig file from your download.

Or simply drag and drop the file into the Figma file browser.

Step 3: Access Components

Open the Assets panel on the left sidebar.

All 150+ components will appear, organized by category.

Step 4: Use in Your Designs

Drag any component onto your canvas.

Use the Properties panel to customize colors, text, and spacing.

Auto-layout components will resize automatically.

Step 5: Switch Themes

Find the Theme Toggle in the top-level frame.

Switch between Dark and Light mode variants instantly.

Step 6: Export for Development

Select components and use Export panel to generate assets.

Use Dev Mode to get CSS/Tailwind code for each component.

License

SINGLE DESIGNER LICENSE

This Figma design system is licensed for use by one designer.

PERMITTED:

- Use components in unlimited personal projects
- Use components in unlimited commercial projects
- Modify and customize components
- Export assets for development handoff

PROHIBITED:

- Sharing the Figma file with other designers
- Reselling components individually
- Redistributing as part of another UI kit
