

CodeSwift

Desktop Markdown Editor & Snippet Manager

- macOS, Windows & Linux Builds
- 50+ Language Syntax Highlighting
- Vim Keybindings & Code Folding
- Local-First Encrypted Backup
- Cloud Sync (Optional)

Features

CodeSwift is an ultra-fast markdown editor designed for developers who write documentation, manage code snippets, and need a distraction-free writing environment.

CORE FEATURES:

1. Lightning-Fast Editor

Built with performance in mind. Opens instantly, even with large files.

No lag, no bloat, no electron-heavy overhead.

2. 50+ Language Syntax Highlighting

Supports JavaScript, Python, Rust, Go, TypeScript, Java, C++, and 40+ more.

Automatic language detection based on file extension.

3. Vim Keybindings

Full Vim mode with all your favorite commands.

Code folding, visual mode, search and replace, and more.

4. Snippet Library

Save frequently used code snippets with tags and search.

Insert snippets with hotkey expansions.

Organize by language, project, or custom tags.

5. Local-First Security

Your files stay on your computer by default.

Optional encrypted backup with end-to-end encryption.

Cloud sync is opt-in, not forced.

6. Split-Pane View

Write on the left, see rendered preview on the right.

Live updates as you type.

7. Export Options

Export to PDF, HTML, or DOCX with one click.

Customizable export templates.

Keyboard Shortcuts

File

New File	Ctrl+N

Insert Snippet	Ctrl+Space
Tag Snippet	Ctrl+Shift+T

Installation & Activation

INSTALLATION GUIDE

macOS Installation:

1. Open codeswarm-markdown-editor.zip
2. Drag CodeSwift.app to your Applications folder
3. Open CodeSwift from Launchpad or Applications
4. Enter your license key on first launch

Windows Installation:

1. Open codeswarm-markdown-editor.zip
2. Run CodeSwift-Setup.exe
3. Follow the installation wizard
4. Launch CodeSwift from Start Menu
5. Enter your license key on first launch

Linux Installation:

1. Open codeswarm-markdown-editor.zip
2. Make the ApplImage executable: `chmod +x CodeSwift.ApplImage`
3. Run: `./CodeSwift.ApplImage`
4. Enter your license key on first launch

LICENSE ACTIVATION:

Your license key is: CSW-2026-DH-XXXX-XXXX-XXXX

Enter it on first launch to activate CodeSwift on one device.

To transfer to a new device, deactivate first in Settings > License.

License Agreement

SINGLE DEVICE LICENSE

CodeSwift is licensed for use on one device.

PERMITTED:

- Install on one computer (macOS, Windows, or Linux)
- Use for personal and commercial work
- Create unlimited documents and snippets

PROHIBITED:

- Sharing the license key with others
- Installing on multiple devices simultaneously
- Reselling or redistributing the software

To transfer your license to a new device:

1. Open CodeSwift on the old device
2. Go to Settings > License > Deactivate
3. Install and activate on the new device
