DigitalHub

Installation Guide

1

Install Node.js

Download Node.js 18+ from <https://nodejs.org> and install it on your computer.

2

Extract Files

Unzip the website-template.zip file to a folder on your computer.

3

Install Dependencies

Open a terminal in the extracted folder and run: `npm install`

4

Start Development Server

Run: `npm run dev` — Open `http://localhost:3000` in your browser

5

Customize

Edit files in `src/` to customize colors, text, images, and layouts.

6

Build for Production

Run: `npm run build` — This creates a `dist/` folder with your optimized site.

7

Deploy

Upload the `dist/` folder to any static host (Cloudflare Pages, Netlify, Vercel, etc.)
